1 Introduction

What is being assessed?

- 1.1** An Equalities Impact Assessment (CORE/15) was submitted as part of the evidence base for the examination of the Huntingdonshire Local Plan to 2036 (submission version 2018). This was submitted as supporting material necessary for the examination of the Local Plan and addressed the Council's duty under the Equalities Act 2010 to carry out race, gender and disability impact assessments.
- 1.2** This assessment updates that document to reflect the proposed main modifications to the Local Plan prepared for consultation following the examination hearings held in July and September 2018.
- 1.3** The main modifications are available in a separate document. For ease of interpretation of this document a summary description of each proposed main modification is included within the tables below. Where no proposed main modification has been put forward then the original assessment for the policy or site allocation, as set out in CORE/15, remains relevant.

2 Assessment of Policies

2 Assessment of Policies

- 2.1** This table provides an analysis of each Local Plan policy against the protected characteristics groups and considers whether the likely effect of the policy is positive (+), neutral (~) or negative (-) with respect to that particular group compared to the overall population. A summary of the proposed main modification is included above the revised assessment of the policy or proposal.

Table 1 Assessment of Policies: The Development Strategy

Policy	Age	Gender	Dis-ability	Marri-age & civil partner ship status	Preg-nancy & mater nity	Race	Relig-ion or belief	Sexual orien-tation	Gender re-assign-ment	Impact of proposed main modification
LP2: Strategy for Development	Removal of 'Local Service Centres' category from the settlement hierarchy. Reduction of the total estimated housing supply within the plan period. Inclusion of a summary of the housing trajectory.									
	+	~	+	~	+	~	~	~	~	Removal of the Local Service Centres category will have a negligible impact on the strategy's focus for promoting development in settlements with greatest opportunity to access services and facilities which should help improve access for all but may have a particularly positive effect on those with restricted mobility through age, disability or pregnancy & maternity. The reduction of the total estimated housing supply is expected to impact equally on all sectors of society in terms of the protected characteristics although may have a detrimental impact on those already experiencing relative poverty.
LP3: Green Infrastructure	The revised text provides clarity on acceptable proposals relating to Grafham Water.									
	~	~	~	~	~	~	~	~	~	The proposed main modification does not affect the assessment.
LP5: Flood Risk	Additional policy text to reflect appropriate climate change allowances and additional supporting text advising on requirements for flood risk assessments.									
	~	~	~	~	~	~	~	~	~	The proposed main modification does not affect the assessment.
LP9: Local Service Centres	Deletion of entire Local Service Centres policy and its supporting text.									

2 Assessment of Policies

Policy	Age	Gender	Dis-ability	Marriage & civil partnership status	Pregnancy & maternity	Race	Religion or belief	Sexual orientation	Gender re-assignment	Impact of proposed main modification
	~	~	~	~	~	~	~	~	~	Specifically identifying local service centres for growth was previously considered to potentially have a positive impact on older people through provision of suitable and accessible homes within their established communities. The level of certainty is reduced by this proposed main modification.
LP10: Small Settlements	Insertion of Alconbury, Bluntisham and Great Staughton within the list of places defined as 'Small Settlements'.									
	+	~	~	~	~	~	~	~	~	The proposed main modification does not affect the assessment as it already has a potentially positive impact on older people through provision of suitable and accessible homes within their established communities.
LP11: The Countryside	Revised text substituting 'recognise' for 'protect' in criterion b.									
	~	~	~	~	~	~	~	~	~	The proposed main modification does not affect the assessment.
